Its construction on different levels will make you enjoy the wonderful views of the Mediterranean Sea. You will choose between 2 types of homes: 4 and 5 bedroom homes with basement, first floor, second floor and solarium with swimming pool, as well as having a subway garage. The interiors of the homes are designed with high-level finishes and, thanks to the large spaces and large windows, light and nature will be part of all the rooms of your home, managing to merge the outdoor areas with the interiors.
